

THE PRECISION PLUS™ SPINAL CORD STIMULATOR SYSTEM

The Precision Plus™ System is engineered to deliver superior outcomes by precisely targeting pain and maintaining therapy over time, in a system designed to fit your patient's lifestyle.

The Precision Plus System's core architecture builds on patented cochlear implant technology, the only Neuromodulation platform approved to restore a human sense – hearing. Applying this breakthrough technology to spinal cord stimulation therapy has revolutionized pain management and patient convenience. The only system with a dedicated power source for each contact on the lead, the Precision Plus System is designed to Get it – precisely target pain – and Keep it – maintain therapy – in a system that fits your patient's lifestyle.

- The ONLY system with a cordless patient Remote Control with a wireless range of up to 24 inches.
- The ONLY system with a Cordless Charger.
- The ONLY system that is designed to precisely target pain by moving the electric field between simultaneously active contacts in 1% increments.
- The ONLY system that can automatically adjust for impedance changes to maintain therapy when leads scar in.
- The ONLY Implantable Pulse Generator (IPG) with a 5-year warranty that cannot be voided by patient non-compliance with the charging routine.^{1, 2, 3}
- An IPG with a contoured, oval shape intended for patient comfort.
- The ONLY system that is designed to precisely target pain with a user-friendly joystick.
- The ONLY system with 1 mm-spaced contacts designed to sculpt the electric field and eliminate “dead spots.”
- Precision Plus is covered by many health plans and insurance companies, including Medicare.
